Do you think technology will make us happy?

解答例

(Yesバージョン) Yes, I think so. Technology has given us a lot of wonderful things like TVs, computers, and smartphones. I am sure these things have made our lives very easy and convenient. So, I think the new technologies will also make us happier in the future.

(Noバージョン) No, I don't think so. It is easy to use like cellphones or smartphones made with technology, and we can sometimes write wrong things about others on the Internet without thinking. So, if we don't use these things carefully, they will sometimes make other people very sad.
